

VEHICLE CONVERSIONS

We have had lots of great vehicle conversions leave our workshop recently - take a look at a few we have completed over the past couple of months.

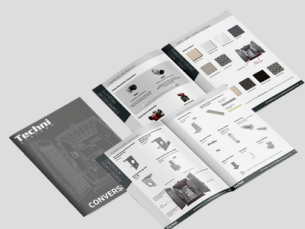

All of our conversions are completely bespoke to customer requirements. We will work with you to put together a custom van conversion that fits you and your business needs.

SYSTEM NOW AVAILABLE FOR FWD CRAFTER / MAN TGE 2023+

We are pleased to announce that we now have a compressed air system available for the FWD Volkswagen Crafter / MAN TGE 2L +AC 2017+. Our new VR40C system delivers up to 40CFM and 165psi.

Our list of vehicles that we can provide engine mounted compressed air solutions for is always growing so get in touch today for more information on our latest developments if we don't currently have a system for your vehicle.

MEET OUR WORKSHOP TEAM

Our workshop team has gained some new faces over the past few months so we thought we would reintroduce everyone. Thanks to our customers continued support our workshop team has doubled in size since this time last year. We have also introduced a new service advisor to assist our customers with service and support.

From left to right we have:

Nick – Product Technician

Hayley – Service Advisor

Jevon – Product Technician

Adrian – Conversion Specialist

Geraint – Product Technician

Axel – Apprentice Product Technician

Jon – Senior Product Technician

Steve H – Conversion Specialist

Rufus – Electrical Engineer (Automotive)

Steve R - Workshop Controller

STRUGGLING TO FIND A VAN?

We have teamed up with a Mercedes van dealer to help source a van if you're struggling to find one. Get in touch today to view our full list of used vans, all of which we have a compressor system available for. The process couldn't be easier - choose your van and have your compressor system and conversion completed all in one place.

Drive away with a fully fitted out new work van!

**WE CAN HELP YOU
SOURCE A VAN!**

A LOOK INSIDE THE FOUNDRY!

All of the brackets used to mount our compressor system components are designed and manufactured by Techni Ltd.

Our brackets start their life in a foundry where molten metal around 1400°C is poured into specially designed moulds and fixtures.

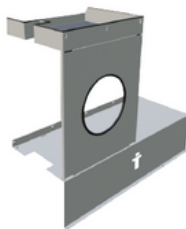

They are then fettled (a process that removes all the extra lumps and bumps) and painted in a protective coating. Once this process has taken place they are then sent back to our engineering department to be machined using our in-house milling machines.

CONVERSION OPTIONS HIGHLIGHT - POWDER COATED PARTS

Our conversion brochure lists all of our available conversion options that can be picked from when designing your van conversion.

We have a range of powder-coated parts from hose reel storage to small floor trays. Take a look at a few of the powder-coated parts listed in our conversion brochure. Take a look at our full range [HERE!](#)
